Summary

Business Information Systems student with a strong interest in backend development. Skilled in C++ and currently building practical experience with Node.js and modern backend technologies. Contributed to the Webpack open-source project and developed a command-line School System application. Looking for opportunities to learn, contribute, and grow as a software engineer.

Experience

Open Source Contributor

Webpack Dec 2025

- Contributed to the **Webpack** open-source project by resolving a **Good First Issue**.
- Submitted and merged a pull request to the **Webpack** open-source project.
- Fixed an issue in the **Webpack** codebase following the project's contribution guidelines.

Projects

School System CLI C++ | Command-Line Application

- **Developed a C++ command-line School Management System with 10 interactive operations for managing students, teachers, and courses.**
- **Implemented 10 CLI commands, including CRUD operations, student enrollment, teacher assignment, and course management.**
- **Applied Object-Oriented Programming (OOP) principles and a modular architecture to build a maintainable CLI application with 10 menu-driven features.**
